

MILTECH™ 908

Compact, Portable Military Gigabit Ethernet Switch

PRODUCT DESCRIPTION

Driven by rapid advancement and lower costs, Ethernet is becoming the standard for IP-based components in a wide range of military and commercial applications, including:

- Vetrionics
- Battle management systems (BMSs)
- Airborne systems
- Land vehicles
- Mobile equipment fielded in harsh environments

Modern platforms often need Ethernet switches to connect computers, sensors, targeting systems and other devices that make these mobile platforms highly effective.

The MILTECH908 is a military-grade managed network switch offering 8 triple-speed (10/100/1000Mbps) ports with D38999 circular connectors. Its gigabit speeds and 24VDC power make it instantly compatible with network device and power systems.

The MILTECH908 is widely used in battlefield communications C4ISR, video, and sensor data acquisition, and transmission. Its mechanical packaging enhancements are designed for MIL-STD-810F airborne and ground environmental compliance and high reliability. Leveraging best-in-class switching technology from Techaya, the MILTECH908 serves as a robust commercial off-the-shelf (COTS) solution for rugged LAN connectivity.
