

# MILTECH™ 912

Compact, Portable Military Managed Gigabit Ethernet Switch

## FEATURES

Driven by rapid advancement and lower costs, Ethernet is becoming the standard for IP-based components in a wide range of military and commercial applications, including:

- Vetronics
- Manned and unmanned vehicles
- Aerial environments

The MILTECH912 is a MIL-STD, fully managed military grade network switch offering 12 triple-speed (10/100/1000Mbps) connections. It can be remotely managed to optimize communications and prioritize critical information traffic. Advanced network features, never before found in a package of this size, include switching protocols, virtual LANS (VLANS), traffic prioritization (QoS), and bandwidth aggregation are standard.

With the best combination of size, weight, power and cost (SWaP-C) in the industry, it saves valuable real estate for computers, sensors, targeting systems, and other devices.

The MILTECH912's gigabit speeds and 24VDC power make it instantly compatible with any network device and power systems in these mobile platforms.

The MILTECH912 is widely used in battlefield communications C4ISR, video, sensor data acquisition and transmission. Its mechanical packaging enhancements, including two ruggedized D38999 circular connectors, is designed for MIL-STD-810F airborne and ground environmental compliance and high reliability. Leveraging best-in-class switching technology from Techaya, the MILTECH912 serves as a robust commercial off-the-shelf (COTS) solution for rugged LAN connectivity.
